

Technical - T

High feasibility with advanced tech identifying suitable rooftops, requiring integration with urban infrastructure.

Economic - E

Moderate economic feasibility due to initial costs, with long-term self-sustainability from produce sales and environmental credits.

Legal - L

Moderate to high legal feasibility, navigating zoning laws and regulations with planning and communication, supported by growing sustainability trends.

Operational - O

Moderate to high operational feasibility, needing new management models and stakeholder engagement, with a focus on continuous agricultural activity support.

Scheduling - S

High scheduling feasibility with strategic planning and adaptable timelines to meet project milestones and policy demand.
